

Preparing Computer Science Students for Global Challenges

A Scholarship Offer for Undergraduate Students Interested in Preparing for 21st Century Computer Science Careers

The Department of Computer Science at the University of Houston is awarding scholarships to academically meritorious, professionally talented computer science undergraduate students with an S-STEM grant from the National Science Foundation. This program offers students preparation for global challenges of the 21st century by enriching their academic preparation in multi-disciplinary approaches.

Qualifications:

- U.S. Citizen or Permanent Resident
- Maintain full-time CS undergraduate status
- Sophomore or higher classification
- Maintain major GPA of at least 3.0
- Demonstrate financial need by filling the FAFSA.

What the S-STEM program offers:

- Up to \$10,000 per academic year based on need.
- + Entrepreneurship and Intellectual Property Courses
- + Guest Speakers Series
- + Professional Development Workshops
- + STEM Ambassador Outreach Program
- + STEM Career Field Trip
